

Designed for the Classic American Home

Classic Beauty and Performance

- XLok® Technology combines a Superior Full Reversed Rolled-Over Nail Hem that doubles the thickness of the panel where it's nailed to the wall, and the proprietary **NailRIGHT®** Siding Installation System for an installation that's secure and accurate
- .046" Panel thickness with a low gloss natural cedar woodgrain pattern
- Thick insulating foam helps reduce energy loss through walls and studs, repel insects, reduce sound transmission and is permeable
- Available in three styles:
 - Double 4" Clapboard, 3/4" panel projection
 - Double 5" Dutchlap, 3/4" panel projection
 - Double 6" Clapboard, 5/8" panel projection
- Matching and contrasting soffit and accessories
- Limited Lifetime Transferable Warranty with **ColorHold®** Lifetime Fade Protection
- Won't blister, crack, flake, peel or rot like wood exteriors, so you'll never have to scrape, sand or paint again, reducing time and cost spent on maintenance
- Can help increase the resale value of your home, making it a wise investment should you ever decide to sell

These are some of the benefits you'll enjoy when you decide to make **American Classic®** Insulated Siding System the choice for the life and looks of your most valuable possession.

THE SUPERIOR FULL REVERSED ROLLED-OVER NAIL HEM COMBINED WITH THE SUPERIOR RIGIDITY OF THE PANEL AND HEAVY DUTY EXTENDED RETURN LEG ENSURE SECURE LOCKING OF PANELS, WHICH PROTECTS AGAINST PANEL BLOW OFF IN ADVERSE WEATHER CONDITIONS.

What You can't see can Hurt your Home

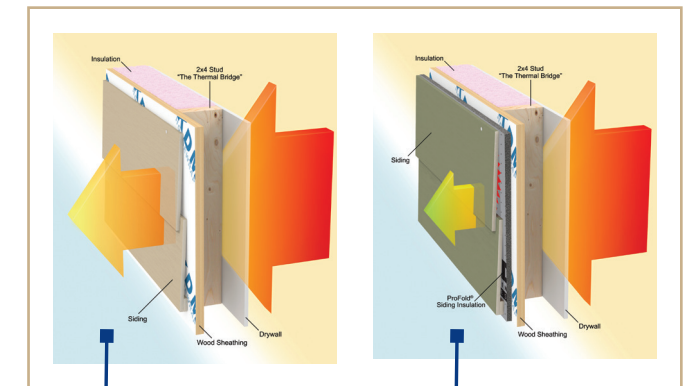

THE AMERICAN CLASSIC® INSULATED SIDING SYSTEM HAS A PERMEABILITY RATING OF 5.0.

Water vapor from cooking, showering and other household activities, and water from rain and snow entering through the exterior, can get trapped inside the wall cavities of a home. Trapped moisture can lead to dry-rot and damage wall studs, and promote the growth of harmful molds and bacteria. The contoured foam backing on the American Classic® Insulated Siding System does not absorb moisture and allows water vapors to escape through the foam and dissipate into the air, creating a healthy, breathing home.

IMPROVE ENERGY EFFICIENCY WITH PRO-FOLD®

Adding ProFold insulation under your new siding can increase the energy efficiency of your home and reduce your heating and cooling costs year round. This professional-grade underlayment provides real energy savings by keeping heat where it belongs, inside in the winter and outside in the summer. And, as an added bonus, ProFold helps level the outside wall before the siding is applied for an installation that's smooth and straight.

BEFORE PRO-FOLD

AFTER PRO-FOLD

ENERGY LOSS

HELPS CONTROL ENERGY LOSS.

Most homes are insulated between the wall studs, but the studs themselves are non-insulated. Energy can escape from inside the home through uninsulated studs, which account for nearly 25% of the wall's surface. Conduction through the wood framing can account for 40% of a wall's heat loss. **American Classic®** Insulated Siding System inhibits the conduction of energy through exterior wall studs, adds insulation and hinders air infiltration. It helps insulate the entire wall for energy efficiency and savings in hot or cold weather.

*A Classic for Comfort
in both Hot or Cold
Temperatures*

As Tough as it is Beautiful

A COMPETITOR'S VINYL SIDING BENDS UNDER THE WEIGHT OF A TEN POUND BOX OF NAILS. AMERICAN CLASSIC® DOESN'T. IT'S AN EXTERIOR SYSTEM THAT'S EXTRA STRONG AND RIGID SO IT LAYS FLAT AGAINST THE WALL, RESISTS DENTS, WON'T BUCKLE, AND STAYS IN PLACE EVEN IN HIGH WINDS. TESTING PERFORMED WITH A DOUBLE 4" AND DOUBLE 5" DUTCHLAP PANEL.

A Panel You can Count on for Weather You can't Predict

- **FOAM INSULATED**—American Classic® Insulated Siding System features a foam insulated backing to help you reduce heating and cooling bills.
- **IMPACT RESISTANT**—Up to 4 times the impact resistance of unreinforced vinyl siding panels.
- **WIND RESISTANT**—The superior locking system includes a full rolled-over double nail hem and 3/4" panel projection* for excellent wind load resistance.

*5/8" panel projection available on D6 panel.

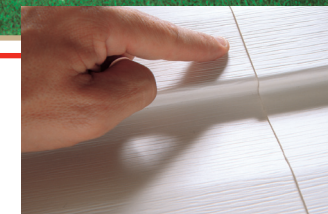

Does more than just Insulate Your Home

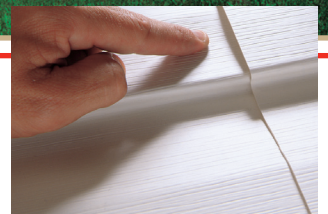

INSECT PREVENTION.

The foam backing in the American Classic® Insulated Siding System does more than just save energy, it protects against insect damage. The backing is treated with PREVENTOL®

TM EPS Preservative Insecticide which kills termites and insects before they can do any real damage to structural wood components. The active ingredient in the insecticide is harmless to installers, homeowners and household pets, and the foam insulation is contoured to the siding profile to eliminate any hollow voids where infestation can occur.

LAMINATED FOAM PROVIDES EXCELLENT SUPPORT TO THE AMERICAN CLASSIC® INSULATED SIDING SYSTEM, SO THE SEAMS REMAIN PRACTICALLY INVISIBLE.

OVER TIME, THE SEAMS ON REGULAR VINYL TEND TO OPEN UP BECAUSE THERE'S NOTHING TO SUPPORT THE SIDING.

A NOISE REDUCTION WALL SYSTEM.

The American Classic® Insulated Siding System can help reduce the transmission of sound from the outside to the inside of your home. The result: A more comfortable, quieter living environment.

Classic Accessories to Enhance...

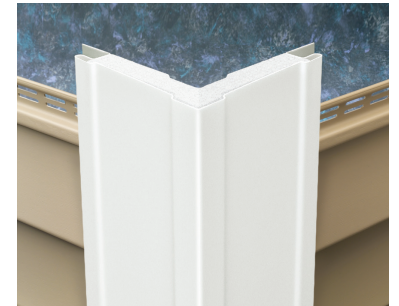

To complement your siding selection, American Classic® Insulated Siding System features a beautiful line of trim accessories.

For areas under overhangs that are difficult to refinish, there's low-maintenance vinyl soffit.

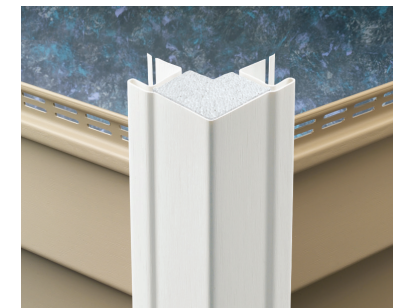

Corner systems, and window and door surrounds, provide added exterior enhancement and low-maintenance protection. These accessories are also available with foam insulation, enabling you to wrap the entire exterior of your home in a blanket of thermal protection.

Match or contrast these trim pieces to your siding color choice, for that beautiful, distinctive finish you've always imagined.

This is a visual representation of the actual fade that can be expected on standard vinyl siding vs. American Classic® Insulated Siding System. Colors shown are as close as the lithographic process will allow.

NailRIGHT™ SIDING INSTALLATION SYSTEM

AVOID:

Hidden Dangers

Nails that miss their mark can be potentially hazardous to items, like wiring and plumbing, located in the cavities between studs.

Blow Off

NailRIGHT helps guide the installer to the studs for an installation that's strong, secure and resistant to blow offs.

Unnecessary Nail Usage

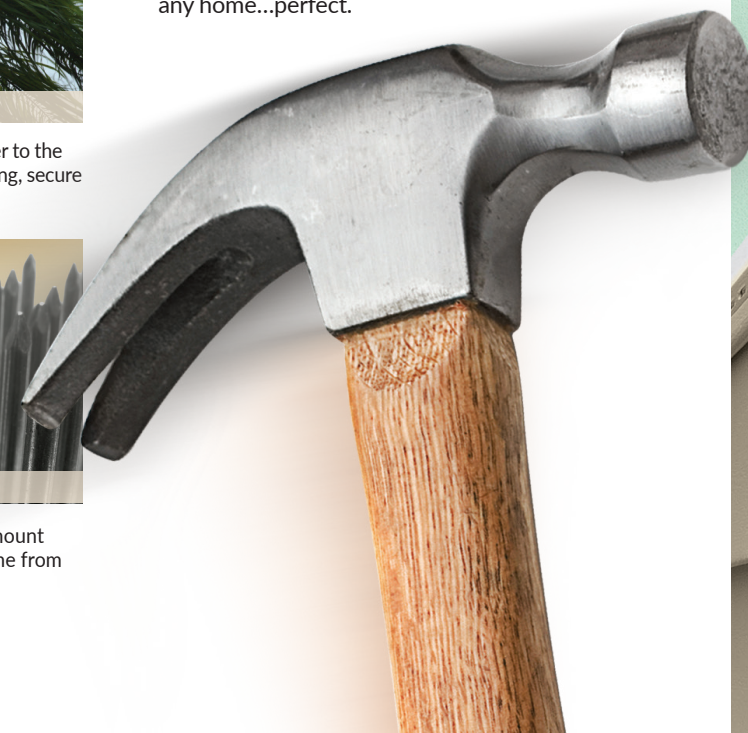

NailRIGHT assures the proper amount of nails are used, saving your home from unnecessary hammer hits.

Your professional installation crew takes every possible precaution to make sure your new siding looks and performs its best.

They use the proprietary NailRIGHT® Siding Installation System to help them locate and precisely nail into the framing studs. This is a very important detail because misapplied nails can cause siding to buckle, blow off in windy conditions, or be hazardous if they strike wiring or plumbing located between the studs.

NailRIGHT® helps ensure an accurate and safe installation. It securely connects the siding to the wall for optimum performance. This means the beautiful siding you select will not only stand out, but will stay up, even in extreme weather conditions.

Beauty and Performance. It's the perfect siding combination to make the exterior of any home...perfect.

Safe, Secure
Installation

THE "X" APPEARS EVERY 8" ON THE NAILING HEM AS A GUIDE TO HELP DETERMINE LOCATION OF HIDDEN WALL STUDS.

*A Product You can be Proud of
from a Contractor You can Depend on*

American Classic Insulated Vinyl Siding is manufactured and designed to give you years of lasting beauty and performance.

But for a siding panel to perform its best, it must be properly installed. That's where we come in. Homeowners throughout the area have placed their confidence in us because of our quality and craftsmanship. They turn to us for consultation on the right products for the exterior of their home. They know they can

trust us for a professional finish that's done right and done on time, and a job site that's totally cleaned-up when the work is finished.

What does all this mean to you? Peace of mind and comfort knowing the products we install will not only add appeal, but durability and performance for many years to come.
